NATURAL HONEY

WHO WE ARE

Natural Honey Ltd proud history began in 2006 when a Gisborne residing beekeeper, Peter, desired to unlock the full flavour potential of New Zealand honey and promote its natural honey. His goal was to demonstrate that New Zealand natural honey is not just a sugar/syrup alternative but a sweetest part of New Zealand full of naturally occurred antioxidants (Methylglyoxal) components.

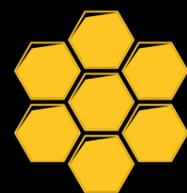

Today we are purveyors of fine this honey from our own hives scattered around New Zealand but also from a selection of beekeepers who like us, choose to produce from more exceptional nectar sources.

Natural Honey Ltd is a 100% New Zealand owned company based in North Auckland. As our name suggests, we are specialists in the production of New Zealand natural honey. Each bottle of our product is prepared using the cleanest, finest and locally sourced raw honey available.

Today we are one of the major honey manufacturers and OEM service providers in New Zealand, and we started to be a genuine global company with contract operations across the globe.

We will continue to endeavour and to constantly raise our standards to be at the forefront of the New Zealand Honey Industry, whilst also developing new innovative honey products to catch your taste.

Keep up to date with our latest news and upcoming products by following us on our website on www.naturalhoneyltd.com

NATURAL HONEY

MANUKA HONEY

Natural Honey Ltd Manuka Honey is harvested from some of the most remote and pristine regions of New Zealand from the flowers of our native Manuka tree. Naturally occurring Methylglyoxal is an ingredient present in Manuka honey.

Manuka honey is produced in New Zealand by bees that pollinate the native manuka bush. Advocates say it treats wound infections and other conditions.

*We guarantee that all our Manuka honey is tested and verified from independent accredited laboratories for its Methylglyoxal content.

WILDFLOWER HONEY

Natural Honey Ltd Wildflower Honey is harvested from nectar of a native source of wild flowers surrounding New Zealand. Enjoy the sweetest part of New Zealand today.

This honey is produced to impeccable standards and has been tested and verified by an independent testing laboratory.

Multiflora honey is a type of honey which has its source from regions where variety of flowers flourish. This honey is sourced from different flora such as tawari, rata, manuka, kamahi and rewarewa etc. This multiflora honey is made by creamed processing to achieve smooth texture. Natural Honey's multi flora honey is light in color and has pleasant sweet taste which is blended from a few different honeys.

Lab Sub Det Dat Ord Rel

Results Summary

3in1 Honey Analysis

Laboratory ID	Sample ID	Dihydroxyacetone DHA
		Units Reporting Limit
		mg/kg 10
16-10623-1	NAT 16021	320
16-10623-2	NAT 16023	127

Method Summary

3in1 Determination of Dihydroxyacetone (DHA), Methylglyoxal concentration in the honey according to AOAC method 998.12, pure honey (free of corn or soy protein) using the NPA and methylglyoxal (MGO) values. The NPA and MGO values are not accredited by IANZ and MGO values less than 5 are an estimate based on NPA.

NPA Non-Peroxide Activity (NPA) values are not directly measured. They are calculated by comparing the NPA and methylglyoxal (MGO) values. The NPA and MGO values are not accredited by IANZ and MGO values less than 5 are an estimate based on NPA.

(1) Isolation by HPLC and characterisation of the bioactive fraction of New Zealand honey. C. J. Adams, et al. Carbohydrate Research 344 (2009) 343 (2008) 651. Carbohydrate Research 344 (2009) 343 (2008) 651.

3 in 1 Honey Analysis

ANALYSIS REPORT

Client: Natural Honey Limited
Contact: Tony Kim
C/- Natural Honey Limited
8F Vega Place
Rosedale
Auckland 0632

Sample Type: Honey

Sample Name:	NAT16011
Lab Number:	1588150.1

C-4 Sugars Analysis

Sample Name	%	Value
5 ¹³ C Honey (Whole)	%	-25.5
5 ¹³ C Honey (Protein)	%	-26.5
Difference (Whole - Protein)	%	1.0
C-4 Sugar Content	%	6.1

Analyst's Comments

Sample 1 Comment:
C-4 Sugar Content:
As reported in AOAC method 998.12, pure honey (free of corn or soy protein) yields a C-4 Sugar Content value of less than or equal to 7%. So, the C-4 Sugar Content value of 6.1% for honey which is in the normal range (more near 7%) is acceptable.

SUMMARY OF METHODS

The following table(s) gives a brief description of the methods used to conduct the analyses for this job. The detection limits given below are those attainable in a reasonably clean matrix. Detection limits may be higher for individual samples should insufficient sample be available, or if the matrix requires that dilutions be performed during analysis.

Sample Type:	Method Description	Default Detection Limit	Sample No
3in-1 Honey Analysis	Water extraction, derivatisation, UPLC-UV analysis (dihydroxyacetone, 5-hydroxymethylfurfural, methylglyoxal). Analysis performed at Hill Laboratories - Food & Bioanalytical Division, Waikato Innovation Park, Ruakura Lane, Hamilton.	1.0 - 10 mg/kg	1

These samples were collected by yourselves (or your agent) and analysed as received at the laboratory.

Samples are held at the laboratory after reporting for a length of time depending on the preservation used and the stability of the analytes being tested. Once the storage period is completed the samples are discarded unless otherwise advised by the client.

This report must not be reproduced, except in full, without the written consent of the signatory.

3 in 1 Honey Analysis

Manuka Honey health benefits / MGO, UMF

- > acid reflux
- > diarrhea
- > duodenal ulcer
- > stomach pain
- > Infections of the helicobacter virus
- > heartburns
- > improvements of the digestion system
- > irritable colon syndromes
- > ulcers
- > inflammation of the colon
- > stomachaches

MGO: Methylglyoxal sterilizes and has antibacterial effects towards harmful bacteria

Strong effects towards harmful bacteria, strong anti-inflammatory effects, used as cancer treatments and anti-inflammatory medication in Europe and India. Dresden University in Germany has researched about Natural Manuka honey and they found this substance 'MGO' when sugar breaks down.

Normal Honey has 1 ~ 5mg of MGO in 1kg
Manuka Honey has 300~700mg of MGO in 1kg

Below MGO 100+ : Nutrition supplements for slight antibacterial effects

Above MGO 100+ : For maintaining general health and wellbeing.

Above MGO 250+ : Antibacterial bacteria being found

Above MGO 400+ : Effective improvements seen in the digestion system

Above MGO 550+ : Effective treatments and cure diseases proven scientifically

UMF(Unique Manuka Factor) indicates the amount of special anti bacterial substances.
The higher the number, the higher the amount of anti bacterial substances it contains.

Below 10+ : Great for well-being and the digestive health

Above 10+ : Effective towards indigestion, diarrhea, heart burns and skin trouble

Above 20+ : Helps cure duodenal ulcer, irritable colon syndromes, gastroenteritis and acid reflux.

Manuka Flower blossom

OEM SERVICES

Clean, sterile, protective environments are essential to your business. From product design and development to regulatory compliance and on-going support, we offer a complete line of custom solutions and dedicated services that help maximise your brand, expand your portfolio and provide safe, clean, protected honey product manufacturing environments.

FACTORY-EFFICIENT OEM HONEY PRICES

Natural Honey Ltd is proud to present the most cost efficient 'factory prices' for our high quality honey and OEM services. Please feel free contact us for free consultation of our OEM services and offers we have in our factory.

CHOOSE YOUR DESIRED NEW ZEALAND HONEY

Natural Honey Ltd provides various high quality 100% New Zealand creamed honey for our clients.

- Manuka Honey MGO 50+ to MGO 800+ (UMF 4.0 to UMF 20.0).
- Multi-flora honey
- Functional fruit honey
- Functional superfood honey

All our products are 100% natural New Zealand ingredients with NO ADDED SUGAR.

BROAD RANGES OF HONEY JARS

SIZE AND SHAPES

Natural Honey Ltd works with **PHARMAPAC**. We have various types of jars in different sizes. Natural Honey Ltd recommends the most popular PET amber jars from 250g to 1kg.

- Square PET jars in 250g, 375g, 500g, 1kg
- Round PET jars in 250g, 340g, 500g
- Hexagon PET jars in 250g, 500g, 1kg

2 colour options

- Amber
- Clear

CLOSURE LINER OPTIONS

Natural Honey Ltd also provides 'Seal Lift and Peel' induction closure services for free to preserve high quality honey.

5 CAP COLOURS

- Black
- White
- Blue
- Green
- Gold

MANUKA BLEND RED GINSENG HONEY

Ingredients - Red ginseng & Honey

Red ginseng is the most popular superfood in Asia for its well-known effects such as reducing stress levels, increase oxygenation to cells for restoration, revitalising blood circulation and detoxifying the body. Benefit the full health package by simply mixing a teaspoonful in a cup of hot tea every day.

Available in 250g 500g PET jar.

INGREDIENTS: 97% Natural New Zealand Manuka Honey, 3% Natural Ginseng extract

PRE-CAUTIONS: People who have allergic reactions to ginseng should seek medical advice before using this product.

MANUKA BLEND LEMON HONEY

Ingredients - Lemon & Honey

Lemon and honey are strong companions to help boost your immune system. Simply mix with a cup of hot water to repulse the bad cold and flu. To taste the full tannic flavour of lemons, complement with baked crumpets or Madeleine cakes.

Available in 250g 500g PET jar.

INGREDIENTS: 97% New Zealand Honey, 2.9% Lemon Extract , 0.1% Natural Lemon Concentrate

MANUKA BLEND CRANBERRY HONEY

Ingredients - Cranberry & Honey

The combination of NZ manuka and the antioxidant cranberry will bring some real health benefits. Tart and sweet is the 21st century taste for smearing on hot breakfast toast and waffles. Blend some into your mixture for a alternative natural sugar assisted with the extra crisp berry flavour.

Available in 250g 500g PET jar.

INGREDIENTS: 97% New Zealand Honey, 2.9% Cranberry Extract , 0.1% Natural Cranberry Concentrate

MANUKA BLEND STRAWBERRY HONEY

Ingredients - Strawberry & Honey

Our NZ manuka and pure strawberry are great friends and they shine their friendship when spread on warm baked desserts; like freshly baked scones. Also, try blending it with milk, strawberries, yogurt and ice in a blender for a healthy sweet strawberry smoothie.

Available in 250g 500g PET jar.

INGREDIENTS: 97% New Zealand Honey, 2.9% Strawberry Extract , 0.1% Natural Strawberry Concentrate

MANUKA BLEND BLUEBERRY HONEY

Ingredients - Blueberry & Honey

Blueberry and pancake is a long-loved classic combination that will your easily compensate your fluffy pancakes. Or warm gently and pour as a hot sauce on vanilla ice cream with fresh blueberries. Also, spread on the base of your favourite pastries for the extra blueberry kick.

Available in 250g 500g PET jar.

INGREDIENTS: 97% New Zealand Honey, 2.9% Blueberry Extract , 0.1% Natural Blueberry Concentrate

MANUKA BLEND RED GINSENG HONEY

Ingredients - Red ginseng & Honey

Red ginseng is the most popular superfood in Asia for its well-known effects such as reducing stress levels, increase oxygenation to cells for restoration, revitalising blood circulation and detoxifying the body. Benefit the full health package by simply mixing a teaspoonful in a cup of hot tea every day.

Available in 250g 500g PET jar.

INGREDIENTS: 97% Natural New Zealand Manuka Honey , 3% Natural Ginseng extract

PRE-CAUTIONS: People who have allergic reactions to ginseng should seek medical advice before using this product.

MANUKA BLEND ROOT GINGER HONEY

Ingredients - Root ginger & Honey

Root ginger and NZ manuka are partners to treat or reduce the effects of asthma. The antioxidant properties of honey and ginger is also an excellent supporter of the heart. It is also welcomed by grilled or baked poultry and Asian dishes. Try a spoonful in your stir fry sauce or mix with soy, fish oil and garlic to create dressing for fish and vegetables.

Available in 250g 500g PET jar.

INGREDIENTS: 97% Natural New Zealand Manuka Honey , 3% Fresh Root Ginger

PRE-CAUTIONS: People who have allergic reactions to ginger should seek medical advice before using this product.

MANUKA BLEND CINNAMON HONEY

Ingredients - Cinnamon & Honey

Cinnamon and NZ manuka are a fusion to help level cholesterol levels and treat obesity. Its bitter- sweet taste is a great flavour for warm hot cross buns, fruit loaf and roasted pears or peaches. It is also delighted in making sweet but healthy popcorn for your family movie nights.

Available in 250g 500g PET jar.

INGREDIENTS: 97% Natural New Zealand Manuka Honey , 3% Ceylon Cinnamon.

PRE-CAUTIONS: People who have allergic reactions to cinnamon should seek medical advice before using this product.

HEALING POWER OF HONEY

Honey has been used since ancient times to treat multiple conditions. It wasn't until the late 19th century that researchers discovered that honey has natural antibacterial qualities. Honey protects against damage caused by bacteria. Some honey also stimulates production of special cells that can repair tissue damaged by infection. In addition, honey has an anti-inflammatory action that can quickly reduce pain and inflammation once it is applied. But not all honey is the same. The antibacterial quality of honey depends on the type of honey as well as when and how it's harvested. Some kinds of honey may be 100 times more potent than others. Components of Manuka Honey Hydrogen peroxide is a component of honey. It gives most honey its antibiotic quality. But some types of honey, including manuka honey, also have other components with antibacterial qualities. The major antibacterial component in manuka honey is methylglyoxal (MGO). MGO is a compound found in most types of honey, but usually only in small quantities. In Manuka honey, MGO comes from the conversion of another compound -- dihydroxyacetone -- that is found in high concentration in the nectar of manuka flowers. MGO is thought to give manuka honey its antibacterial power. The higher the concentration of MG, the stronger the antibiotic effect. Honey producers have developed a scale for rating the potency of manuka honey.
